Parts of a Plant

Like different organs of a human body, plants also have different parts and each part plays an important role. Let's understand more about plants.

Observe the above picture and fill in the blanks with words given in the box.

1. Plants produce the food with the help of leaves.
2. Fruits and seeds are produced by flower.
3. Stem is carrier of water and food.
4. Roots are responsible for the firm grip of plants to the ground.
5. To grow a new plant we need seeds.

leaves	seeds
